Audio 2017/2018

Bluetooth Speakers

BT03BL/BK

These Bluetooth loudspeakers are an essential element in social meetings at home or outdoors. This device also improves the sound quality of your telephone or tablet. A sportsperson, party-goer or student will certainly appreciate the clean sound flowing from these small-sized loudspeakers.

The BT03BL/BK is a high-quality device which allows you to enjoy your favourite music wherever you are. The Bluetooth function lets you play selected music from a device such as a tablet, a smartphone and a laptop, and the MP3 player allows you to listen to songs saved in your own music library. The FM tuner will satisfy those who prefer to spend time with their favourite radio station.

Micro Systems

MS40BT

Micro systems are devices which are enjoying unflagging popularity. Their small size and high-quality sound make them valued equipment for all kinds of office and residential interior. They are as perfectly suited to your bedroom as to your child's room.

The MS40BT is equipped with a drive for playing conventional CD discs, and is also able to play CD-R recordable discs and CD-RW rewritable discs. As well as the traditional CD-Audio format, they can also play MP3 files. The Bluetooth module which supports the wireless transmission of music files contained in compatible portable devices such as smartphones and tablets will help you create a pleasant atmosphere whenever you want to relax or have a meeting with friends.

Receivers

PP11BT

Receivers can be used as a household radio or an MP3 player. They are excellent as both stationary and portable devices. They come with a complete set of functions which are very convenient on a family picnic or a trip out of the city.

The portable PP11BT radio player has a built-in FM tuner capable of pre-set up to 60 radio stations. The Bluetooth module allows you to connect all kinds of compatible sound sources such as smartphones and tablets, and to play your favourite music files from the both the memory of the paired devices and the streaming services available through these devices. The PP11BT is also compatible with microSD cards up to a maximum capacity of 32GB, and has an AUX connection, which allows you to connect with more sound sources. Furthermore, the radio player has an alarm clock, which makes it even more useful! The built-in battery enables the device to work continuously for up to 7 hours without having to connect to a power supply, while the compact size of the PP11BT makes it an ideal multi-functional source of sound, both at home and everywhere else.
